

Temporary output patches for tagging and better link support

Frank Mittelbach

Ulrike Fischer

v0.85a 2023-07-20

1 Introduction

This file contains a few patches of internal L^AT_EX commands to support paragraph tagging across page boundaries (in pdfL^AT_EX) and improve the behaviour of links across page breaks.

Until this get properly integrated with the kernel code this has to be taken as a prototype and code, interfaces as well as behavior may change without notice and certainly without any backwards compatibility!

2 The Implementation

```
1 (*package)
2 \ProvidesPackage{latex-lab-testphase-new-or-1}
3   [\ltlabneworIdate\space v\ltlabneworIversion\space
4    Temporary output patches for tagging and better link support]
5 \RequirePackage{etoolbox}

2.1 Patching the OR

This adds hooks around header and footer, in \@makecol and in multicol. At first
initialize some of the hooks. We use providecommand to avoid problems if the kernel
changes here and provides them directly.

6 \providecommand{\@kernel@before@head}{}
7 \providecommand{\@kernel@before@foot}{}
8 \providecommand{\@kernel@after@head}{}
9 \providecommand{\@kernel@after@foot}{}
10 \providecommand{\@mult@ptagging@hook}{\% multicol

11 \patchcmd{\@outputpage}
12   {\vfil\color@hbox\normalcolor\hb@xt@\textwidth{\@thehead}\color@endbox}
13   {\vfil@\kernel@before@head\color@hbox\normalcolor\hb@xt@\textwidth{\@thehead}\color@endbox\@}
14   {\typeout{Patching header in \string\@outputpage}}{\PATCHerror }
15
16
17 \patchcmd{\@outputpage}
18   {\color@hbox\normalcolor\hb@xt@\textwidth{\@tfoot}\color@endbox}
19   {\@kernel@before@foot\color@hbox\normalcolor\hb@xt@\textwidth{\@tfoot}\color@endbox\@kernel}
20   {\typeout{Patching footer in \string\@outputpage}}{\PATCHerror }
```

\@makecol We have to patch \@makecol in two places:

- update 255 up front to add missing tmb/tme if necessary
- update the \footins stream if that one got split

We patch \@makecol, if new-or-2 is loaded too it will overwrite that again.

```
22 \providecommand{\@kernel@before@footins}{}
23 \providecommand{\@kernel@tagsupport@@makecol}{}
24
25 \patchcmd{\@makecol}
26   {\vskip\skip\footins}
27   {\vskip\skip\footins\@kernel@before@footins}
28   {\typeout{Patching \string\@makecol\space for tagging}}{\PATCHerror }
29
30 \patchcmd{\@makecol}
31   {\let\@elt\relax}
32   {\@kernel@tagsupport@@makecol\let\@elt\relax}
33   {\typeout{Patching \string\@makecol\space for tagging}}{\PATCHerror }
34
35 \AddToHook{package/footmisc/after}
36 {%
37   \def\@makecol{%
38     \setbox\@outputbox \box\@ccilv
39     \global\@removebskip
40     \global\@tagsupport@@makecol
41     \let\@elt\relax
42     \xdef\@freelist{\@freelist\@midlist}%
43     \global\let\@midlist\@empty
44     \global\@makecol@appendblocks
45     \ifvbox\@kludgeins
46       \makespecialcolbox
47     \else
48       \makernormalcolbox
49     \fi
50     \global\maxdepth\@maxdepth
51   } }
```

(End of definition for \@makecol. This function is documented on page ??.)

2.2 multicol adjustments

The patches for pkgmulticol are fairly minimal:

- At the start of the environment anything already on the page is picked up and stored in \partial@page, we may need to add a TMB to that (it should have a proper TME). This has to happen in the “main” stream context.

•

•

```
52 \AddToHook{package/multicol/after}
53   {%
54    \global\@addtoreset{\@multicol@begin}{\@multicol@end}
```

```

54 \patchcmd\page@sofar
55   {\global\dimen\tw@\dp\z@}%
56   {%
57     \global\dimen\tw@\dp\z@
58     \mult@ptagging@hook
59   }%
60   {\typeout{Patching \string\page@sofar\space for tagging}}{\PATError}%
61 }

```

2.3 Interrupt hooks

This requires the l3pdfannot module! We add the code here and not in hyperref, as it should also work with links created directly with the l3pdfannot commands. The file is only loaded by the pdfmanagement, so no need to test if the commands exist.

```

62 \ExplSyntaxOn
63 \def\@kernel@before@head{\pdfannot_link_off:}
64 \def\@kernel@before@foot{\pdfannot_link_off:}
65 \def\@kernel@after@head {\pdfannot_link_on:}
66 \def\@kernel@after@foot {\pdfannot_link_on:}
67 \ExplSyntaxOff
68 </package>
69 <!*latex-lab>
70 \ProvidesFile{new-or-1-latex-lab-testphase.ltx}
71   [\\ltlabneworIdate\\space v\\ltlabneworIversion\\space
72    latex-lab wrapper new-or-1]
73 \RequirePackage{latex-lab-testphase-new-or-1}
74 </!*latex-lab>

```

Index

The italic numbers denote the pages where the corresponding entry is described, numbers underlined point to the definition, all others indicate the places where it is used.
